

ECO — SOCIETY

First meeting in Poland!

Everything started!

We were waiting for it for a long time! The project entitled "Take nothing but photos, leave nothing but footprints, kill nothing but

among local community about the necessity of environmental protection.

From 12th till 16th November Szkoła Podstawowa w Lgocie Górnej was hosting teachers and students from partner

time" started. The coordinator country is Poland. The partner countries are Turkey, Germany, Italy, Spain and Romania and Bulgaria. The topic of the project is ecology. The main aim of the is increasing the awareness

countries.

Making Eco-robots

One of our main aim this international meeting was Eco-robots from rubbish. Polish students gathered rubbish from the

beginning of the school year. They were looking for boxes, plastic bottles, tins and many others kinds of rubbish.

Important dates:

- 1st April—Birds Day
- 1st—7th—Pure Water Week
- 22nd April —Earth Day
- 31st May—Day without a cigarette
- 1st June -Forest and Tree Planting Day
- 5th June - Environment Day
- 6th June - Car-Free Day

First meeting in Poland!

Partners visited Bobolice (a medieval castle), Cracow and Wieliczka Salt Mine,

the municipality of Kozięgłowy and the mayor- Mr Jacek Ślęczka. Teachers

from different countries showed films and presentations about their schools, countries and also presented environmental hazards in the local area. In connection with the environmental issues of the project workshops - making eco-robot was conducted. Visiting water supply in Myszków where water purification process was observed and visiting a Jurajska - mineral water producing company was also connected with the topic of the project. The Jurajska company showed also the process of mineral water production and how the company cares about the

environment, guests learned about the largest natural wealth of the region -

Making Eco-robots.

On 14th November 2012 students from different countries worked together in groups to create Eco-robots. Now we know that rubbish can be used also in different way, more artistic.

„Now we know that rubbish can be used also in different way, more artistic”

What do you know about Poland? COMPETITION!!!

TRY TO ANSWER THE QUESTIONS BELOW. Write down the answers and give them to your coordinator-teacher.

1. Which city is now the capital of Poland?
2. What countries borders Poland?
3. The approximate

population of Poland is about?

4. Which sea does Poland have an access to?
5. What important event did Poland host in 2012?
6. What are "pierogi"?
7. The Polish currency is called

the:

8. How would you greet in Polish?
9. What is the longest River in Poland?
10. Name three famous polish people.

Three students with correct answers will

An interview with a foreign student.

Interviewer: What's your name?

İpek Cicek: **My name is İpek.**

I: What's your surname?

IC: **My surname is Çiçek.**

I: How old are you?

IC: **I'm 14 years old.**

I: Where are you from?

IC: **I'm from Kayseri, Turkey.**

I: What are you interested in?

IC: **I'm interested in writing poems, playing volleyball and folk dance.**

I: Do you like our school and

Poland?

IC: **I like Poland and the school very much.**

I: Have you got friends in Poland?

IC: **I have got a lot of friends in Poland and I like them. Especially I missed Ania.**

I: What do you think about polish students?

IC: **Polish students are very friendly and helpful. They taught me some Polish words.**

I: Do you like polish language?

IC: **I liked Polish language but it's**

very difficult to say words.

I: Do you want to come back to Poland?

IC: **Finally I want to visit Poland again. Greetings, İpek.**

Environmental problems in our countries.

Major Environmental Issues in Europe (according to our research):

- Harmful Chemicals
- Intensive Agriculture and Industrialization
- Acid Rains
- Food Wastage
- Air Pollution
- Endangered Species

Europe is a continent which represents greater number of developed countries in comparison to any other continent. Almost all the European nations are taking strict actions to fight off the environmental issues in the best possible way. The environmental problems in Europe are therefore, equally important as that in any other part of the

world

Almost all the European nations are taking strict actions to fight off the environmental issues in the best possible way.

Words to remember. Check their meaning a dictionary.

Take a break!

A golden pigeon is a symbol of the Universal Declaration of Human Rights. In 2008, at the 60th anniversary of the ONZ Declaration, German artist Richard Hillinger carved a life-size statue of a pigeon. He created 30 such gilded statues, symbolizing the 30 human rights declaration. "Golden Pigeon" are going around the world. They are given to the people who

contributed to the struggle for human rights, they visit the local governments, institutions and schools. They have already been hosted by Pope Benedict XVI, the Dalai Lama, Chancellor Angela Merker, Václava Havel, Jerzy Buzek and Lech Walesa. And now the golden pigeon travelled from Germany to Poland as a proof that even small insitutions are doing a lot of things towards

Jokes

If people from Poland are called 'Poles' then people from Holland should be 'Holes'.

Spring is nature's way of saying, "Let's party!"

Two planets meet. The first one asks: "How are you?"
"Not so well", the second answered "I've got the Homo Sapiens."
"Don't worry," the other replied, "I had the same. That won't last long."

If you live in an igloo, what's the worst thing about global warming?
No privacy!

President Bush has a plan. He says that if we need to, we can lower the temperature dramatically just by switching from Fahrenheit to Celsius.

Do you know?

Cutting of 17 trees allows you to produce one ton of paper. Poland produces 2 million tons of paper per year, which involves cutting 34 million trees.

Glass products are re-processed at 100%. If every Polish during the year throws out 1 jar of the jam, it will create 10 million kilograms of glass.

Annual production of household waste in Poland is a size of a pyramid with a square base whose side length is 1 km. Its height, however, is comparable to the 45-storey building.

Each glass bottle, which is used again, helps to save the energy needed to light 100 watt light bulb for 4 hours

► On the way to success,
we are responsible for
our own school career"

Thanks for
visiting us!

Our school is a complex of two schools—primary and low secondary. There are 124 students and 22 teachers in primary school. We are proud of our new playground! We won a lot of sports competitions. There is one ICT classroom with 12 computers, one canteen and a common room, a staff room, a conference room, a library, a kindergarden and a school gym. There is also a new Science and Language classroom. We learn English, German, Science, History, Music, Art, ICT, PE, RE, Polish, Technology in primary school. There are also a lot of after lessons activities.

Description of the project

Comenius project entitled "Take nothing but photos, leave nothing but footprints, kill nothing but time" will engage 7 schools from 7 different countries. This project will allow teachers, students and local community see the necessity of environmental protection and preservation of natural beauty

Fundacja Rozwoju Systemu Edukacji

surrounding us.

The main aim of the project is to create the awareness among students, teachers and local community about the human influence on the world around us. Moreover, we

want to show that human beings changing their life a little can make a lot towards environmental protection. We want to explain difficult terms such as: recycling, greenhouse effect, climate change and so on.

During this project our slogan will be Benjamin Franklin's words: "Tell me and I forget, teach me and I remember, involve me and I learn". We want to involve students in a lot of experiments, take them to many institution showing them how people now take care about the environment and also showing them how people destroy the environment.

The professional development of teachers will also be our aim. When the project ended, the teachers will have the knowledge how they can

refer to environmental protection during every lesson, this will cause more lessons about environmental protection and larger knowledge about this topic. Teachers will also learn new methods and strategies of teaching.

The project aims also in students, teachers and local community English language development and cultural development. Students, teachers and local community will have the opportunity to practise English in real life situation. They will also have the opportunity to meet new cultures and better understand foreign people and this will cause more tolerance
